

Product Sales Performance Analysis Dashboard

Project Overview

This Power BI project analyzes product sales data to uncover revenue drivers, profitability trends, regional performance, and seasonal sales patterns. The dashboard was developed to support business decision-making through interactive visualizations and actionable insights.

Objectives

The analysis aims to answer the following business questions:

- Which products generate the highest revenue and profit?
- Which regions contribute most to sales performance?
- How does seasonality affect sales?
- What factors influence profitability?
- What strategic actions can improve business performance?

Tools Used

- Power BI
- Power Query
- DAX
- Microsoft Excel

KPIs Included

- Total Revenue
- Total Profit
- Profit Margin
- Total Units Sold

Purpose

This page enables stakeholders to quickly assess overall business health before exploring detailed analysis.

Product Revenue Analysis

Business Question

Which products generate the highest revenue and profit?

Visuals

- Revenue by Product
- Profit Margin by Product
- Product Performance Summary Table

Key Findings

- Paseo generated the highest revenue among all products.
- VTT and Velo were strong secondary contributors.
- Carretera generated the lowest revenue.
- Profit margins varied considerably between products.

Business Implications

The results indicate that Paseo is the primary revenue driver and should remain a strategic focus. Lower-performing products may require pricing reviews, promotional campaigns, or repositioning strategies.

Regional and Seasonal Analysis

Business Question

How do sales vary across regions and seasons?

Visuals

- Revenue by Country
- Seasonal Sales Performance

Key Findings

Regional Performance

The highest sales were recorded in:

- Germany
- France
- Canada
- United States

These markets contribute the majority of overall revenue.

Seasonal Performance

- Autumn recorded the highest sales.
- Winter followed as the second strongest season.
- Spring generated the lowest sales volume.

Business Implications

The findings highlight opportunities to optimize inventory planning, marketing investments, and resource allocation around seasonal demand patterns.

Organizations can prioritize high-performing markets while investigating growth opportunities in lower-performing regions.

Profitability Analysis

Business Question

What factors contribute to profitability?

Visuals

- Total Profit KPI
- Units Sold vs Profit Analysis
- Profit by Product
- Monthly Profit Trend by Product

Key Findings

- Total profit exceeded \$16.8 million.
- Paseo generated the highest overall profit.
- Products with higher sales volumes generally achieved stronger profitability.

- Profit performance fluctuated throughout the year, indicating seasonal influences on profitability.

Business Implications

Understanding the relationship between units sold and profit enables management to identify high-value products and optimize pricing, discounting, and sales strategies.

Monitoring profit trends over time also helps support forecasting and financial planning.

Key Recommendations

Revenue Growth

- Continue investing in top-performing products such as Paseo.

- Expand distribution and marketing efforts in high-performing markets.

Profitability Improvement

- Review pricing strategies for mid-tier products.
- Focus on improving profit margins alongside revenue growth.

Seasonal Planning

- Increase promotional activities before peak sales periods.
- Introduce targeted campaigns during low-performing seasons.

Market Expansion

- Investigate underperforming regions for potential growth opportunities.
 - Develop localized marketing strategies to strengthen market penetration.
-

Conclusion

This project demonstrates the use of Power BI for transforming raw sales data into meaningful business intelligence. Through revenue analysis, regional and seasonal performance evaluation, and profitability assessment, the dashboard provides actionable insights that can support strategic decision-making and business growth.
